Wall cable duct 40x80x40 grey

Article number: 29122

Product description

The 40x80x40 Wall cable duct is used on Multi Dwelling Units. It can be used both to cover up new-to-install fiberglass cables but also to cover up existing smaller sized cable ducts which have been used over the years to for example cover up COAX-cables. Because of the higher demand in broadband these same units are now in need for fiberglass which can be installed/distributed by using the existing smaller sized cable ducts. The 40x80x40 Wall cable duct will provide a neat visual finish by covering up both the fiberglass cables as well as the old cable ducts.

Features and Benefit

- Easy to install
- Universal applicable
- Impact resistant
- Ability to drill holes over the entire length of the cable duct
- Ability to cover up existing type 4 stainless steel profiles
- Ability to cover up existing COAX-cable ducts
- Ability to paint due to good adhesiveness
- Easy to saw
- Increased UV resistance

Colours

Grey (RAL 7042)

Article number

29122: Wall cable duct 40x80x40 grey

Packaging
Wall cable ducts per cardboard: 10 x 2 m
EAN-number per piece: 8712259330044
Cardboard dimensions: 2030 x 220 x 150

All products suitably packed in recyclable materials and clearly labelled with Attema article number and description.

Physical characteristics

Color: grey
Length: 2000mm
Width: 80mm
Height: 40mm
Weight: 1Kg per piece
Material: Extruded Plastic
Surface protection: Untreated

Technical characteristics

Impact: Able to drill a Ø6mm hole at -5 / + 50 °C with a hammer drill

Temperature: Storage -10 °C / + 50 °C
Installation - 5 °C / + 50 °C
In use -20 °C / + 60 °C
